Securboration Annual Company Conference

Date: November 15, 2022 Time: 09:00 a.m. – 03:00 p.m.
Location: 1050 W NASA Blvd, Melbourne, FL 32901

Time	Presentation
09:00 AM	**Opening Remarks** Presenter: Lee Krause Description: Lee Krause is one of the founders of Securboration Inc. Since its inception over two decades ago, the company has been at the forefront of innovative and tactical solutions for both the government and commercial sectors. Mr. Krause will examine the IMPACT Securboration Inc. has made and his vision for the company's future.
09:20 AM	**Keynote Talk** Presenter: Gen. Eric Froehlich Description: Gen. Froehlich is Chief Operating Officer of the Small Business Consulting Corporation (SBCC) and a Brigadier General retired from the United States Air Force. Now, through partnerships with the U.S. Air Force, Froehlich helps the U.S. Department of Defense find and connect with innovative companies to help transition their best technologies for the nation's most critical defense missions. At IMPACT 2022, Froehlich will speak about the USAF's process for finding innovative technology and what small innovative companies like Securboration Inc. must do to represent their solutions in a way that is attractive to the USAF and DoD users. Froehlich will go over the expectations of the customer, following this year's conference theme: IMPACT.
10:00 AM	**BAD&T** Presenter: Tim Kesecker Description: Tim Kesecker will explain the technical innovations and associated applications being developed by Securboration Inc.'s Business Analytics and Digital Transformation team that can improve the day-to-day operations and overall productivity of your enterprise.
11:00 AM	**JCSO** Presenter: Jamie Crutchley Description: Jamie Crutchley will speak about Securboration Inc.'s Joint Command Support Office (JCSO). Securboration's JCSO specializes in RDT&E projects supporting USTRANSCOM's efforts to project and sustain the joint force through advanced data management, text analytics, and cyber security.
11:30 AM	**GENESIS – C2ISR** Presenter: Phil Warlick Description: Phil Warlick will talk about advancing the state-of-the-art standard in Command and Control, Intelligence, Surveillance and Reconnaissance (C2ISR) to enable joint all-domain operations across the Department of Defense (DoD,) Intelligence Community (IC,) and the whole of government.
12:00 PM	**Lunch Break**

01:15 PM	**SNICH/VIBRANT – Operational Cyber** Presenter: Tod Hagan Description: Tod Hagan will touch on the increasing number of sophisticated nation-state adversaries and rouge hacker organizations that now are actively participating in the modern battlespace. The availability of commercial and easily accessible tools combined with an increased number of attack surfaces are lowering the barrier to entry and therefore increasing the likelihood of cyber-attacks. Our mission success hinges on the ability to create an unambiguous and trustworthy picture of the battlespace from ISR assets producing an overwhelming volume and velocity of data. In this briefing, Securboration addresses a key challenge which is mission defense team's lack of cognitive bandwidth and required tools to detect cyber intrusion and counter adversarial deception. Securboration Inc., with support from DoD cyber research and test organizations, has developed, certified and deployed a defensive cyber technology to help ensure mission data confidence and integrity.
02:00 PM	**Rampart – Strategic Cyber** Presenter: Jacob Staples Description: Jacob Staples will highlight Rampart, an ML-powered application security solution. Rampart protects deployed software from a wide variety of issues, including supply chain compromise, vulnerabilities in third-party code (including zero-days), and bugs. As a learning-based tool, Rampart is entirely agnostic of specific attack vectors — any application misbehavior is identified at machine speed. Rampart can easily be integrated into existing software development pipelines without requiring code rewriting or invasive tooling. Welcome to the future of application resilience.
02:30 PM	**CTO Talk** Presenter: Lowell Vizenor Description: Lowell Vizenor will speak about Securboration Inc.'s implementation of a DevSecOps pipeline to integrate security into a continuous integration, continuous delivery, and continuous deployment pipeline. In addition, he will speak about how the DevSecOps pipeline will positively impact the development, maintenance, and reuse of core products to speed the delivery of value to our customers.
03:00 PM	**END** Thank you for attending Securboration Inc.'s "Tech Conference: IMPACT 2022."
